

Why SchoolTube Should Be Allowed Into Your School

For schools or school districts that may be blocking access to SchoolTube, please share the following info with your Principal or IT department for their review, so they may learn more about Schooltube.com and hopefully choose to grant access for your classrooms.

SchoolTube is a safe and fully moderated site that is endorsed by over a dozen National Education Associations, including the National Secondary School Principals, the National Middle School Association, the National Elementary School Principals Association and the HIN Division of the National Education Association.

The unique moderation process used by SchoolTube requires that every education professional that registers in SchoolTube be verified by our education support staff. Once verified as a teacher or other education professional, that user is given "moderator" status. Content uploaded by a moderator goes live as soon as it is encoded. Content uploaded by anyone other than a moderator (a "non moderator") is held for viewing and approval by moderators registered under that users school or organization. If content is uploaded by a non moderator from a school or organization that does not have a registered moderator, that content is moderated by the SchoolTube education support staff.

ALL content in SchoolTube is uploaded by or approved by a moderator – NO EXCEPTIONS.

All content that is uploaded to ST is tracked as to user names and IP addresses for upload and moderation. This allows for identification of potential problems as soon as they may occur, so that ST may take appropriate action to keep all content safe for the K-12 education community.

In addition to the moderation process, SchoolTube utilizes a flagging mechanism for content that a viewer feels is questionable. This means that an email is sent to the ST education support staff as soon as a video is flagged, requiring that it be reviewed.

Please add "SchoolTube.com" and our domain name as one of your "trusted" sites, so that your administrators, teachers, students and community can enjoy the benefits that more than 35,000 other K-12 schools are experiencing.

We invite you to visit www.SchoolTube.com and our partners tab for additional information, or feel free to call us at 866-447-3269 and ask for our IT department.
